

Product Design and Development Intern at Blustash, Inc.

Location: Remote

Department: Engineering

Employment type: Internship, Part-time (10-15 hours a week)

Duration: January 2027 – June 2027 (unless extra extension is given)

Compensation: [\$0/Possible Academic credit]

About the Role

We are looking for a curious, creative, and technically minded **Product Design & Development Intern** to help turn ideas into useful, intuitive digital products. You will work alongside the company's co-founders and other key stakeholders throughout the development process - from research and concept exploration to prototyping, implementation, and launch.

This internship is ideal for someone who enjoys balancing user needs, business goals, and technical constraints. You do not need to know everything already; we are looking for strong fundamentals, thoughtful problem-solving, and a willingness to learn.

What You'll Do

- Support user research, competitive analysis, and synthesis of customer feedback.
- Create user flows, wireframes, prototypes, and polished interface designs.
- Help define and improve product interactions, visual systems, and reusable components.
- Collaborate with engineers to understand technical requirements and bring designs to life.
- Contribute to front-end development, prototyping, or design-system implementation, depending on your skills.
- Participate in design critiques, product reviews, sprint planning, and team workshops.
- Test product experiences, identify usability issues, and recommend improvements.
- Document design decisions, requirements, and implementation details.
- Take ownership of a defined product feature or project from exploration through delivery.

What We're Looking For

- Currently pursuing or recently completed a degree, certificate, or equivalent training in product design, UX/UI design, interaction design, computer science, engineering, or a related field.
- A portfolio or work samples demonstrating your design process and problem-solving approach.
- Familiarity with design and prototyping tools such as Tinker CAD or CAD 3D.
- Basic understanding of user-centered design, responsive design, accessibility, and usability principles.

- Interest in how products are built, including collaboration between design and engineering.
- Strong written and verbal communication skills.
- Ability to receive feedback, iterate thoughtfully, and manage multiple priorities.
- Initiative, curiosity, attention to detail, and a collaborative mindset.

Nice to Have

- Experience with HTML, CSS, JavaScript, React, or another front-end framework.
- Familiarity with design systems and component libraries.
- Experience conducting user interviews or usability tests.
- Understanding of agile product-development practices.
- Experience with analytics tools, no-code platforms, or AI-assisted design and development workflows.
- A personal, academic, or freelance project that you helped take from concept to completion.

What You'll Gain

- Hands-on experience working on real product opportunities.
- Mentorship from experienced design, product, and engineering professionals.
- Exposure to the full product-development lifecycle.
- Opportunities to strengthen your portfolio with meaningful, measurable work.
- Regular feedback and professional-development support.
- A collaborative environment where your ideas and perspective are valued.

About Us

Blustash is a Bluetooth electronics company that specializes in custom 3D printed Bluetooth speakers. Blustash also provides 3D printing services on a small scale to customers. Our mission is to "Deliver a harmonious blend of immersive audio experiences, seamless convenience, and uplifting vibes to enhance our customers' enjoyment". We are looking for a creative, organized, and curious Social Media Marketing Intern to help strengthen our online presence and engage our digital community.

How to Apply

Please submit your resume and a brief note explaining your interest in the role to blustashconnect@gmail.com. Include links to a portfolio, social media account, or relevant work samples, if available.

If selected, our team will review your application and reach back out via email for a 30-minute virtual interview on Google Meet. Please come prepared with questions and join online 5 minutes prior to the interview. Our typical hiring process may take 1-2 months.

Blustash, Inc. is an equal opportunity employer. We welcome applicants of all backgrounds and are committed to creating an inclusive workplace.
